

Download & Installation Process of Siemens STEP 7- Micro/Win V4 Software

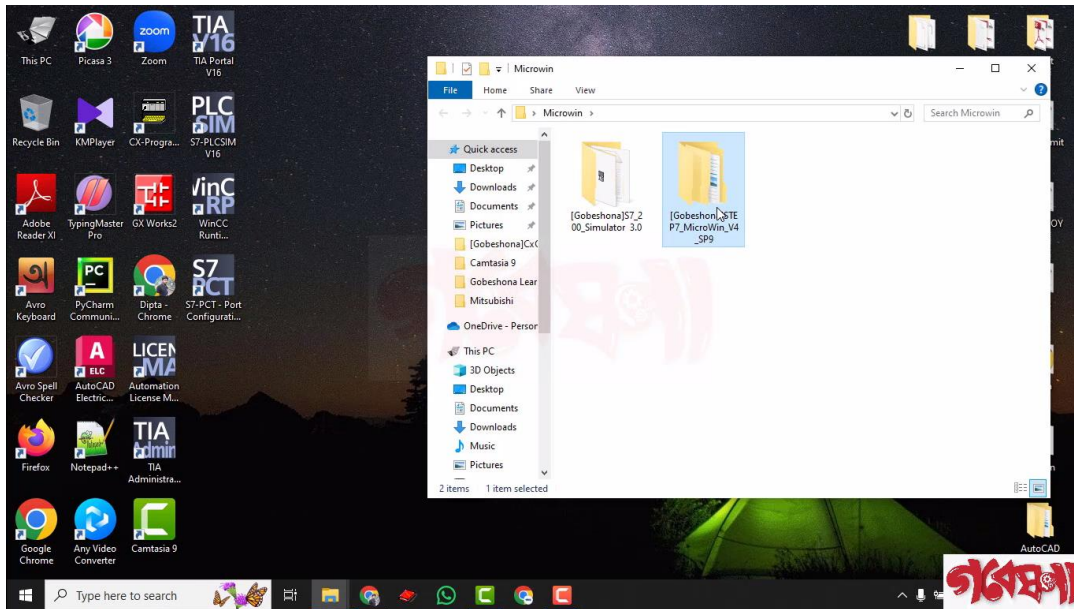

To download this software please follow the “[Google drive](#)” link.

This software is totally free and it’s easy to install.

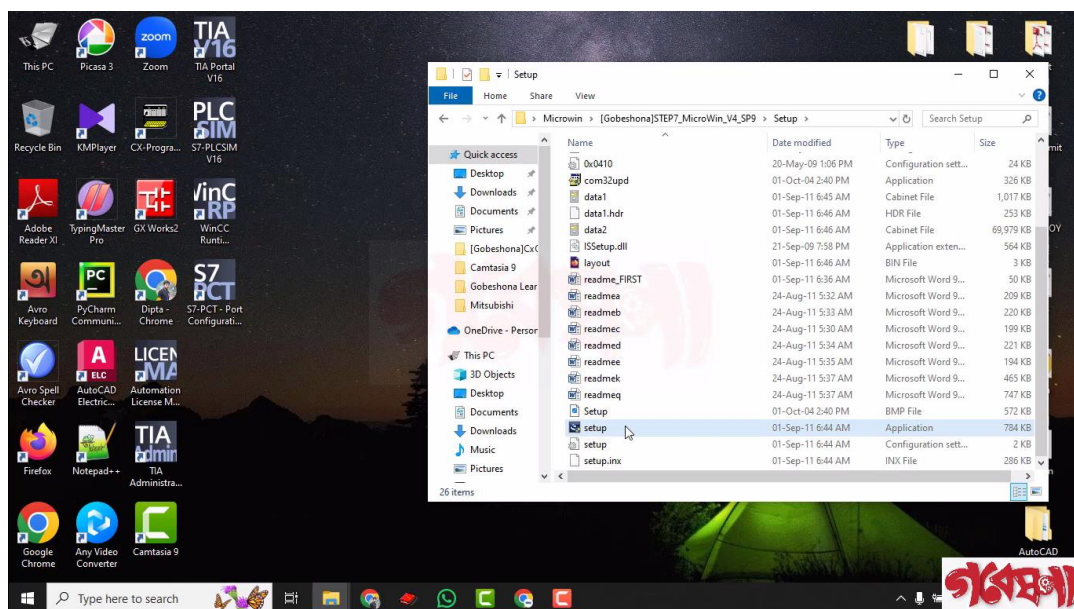

- Step-1: At first we have to extract the zip file named “[Gobeshona]Microwin PLC.zip”.

After getting extracted we will get two folder.

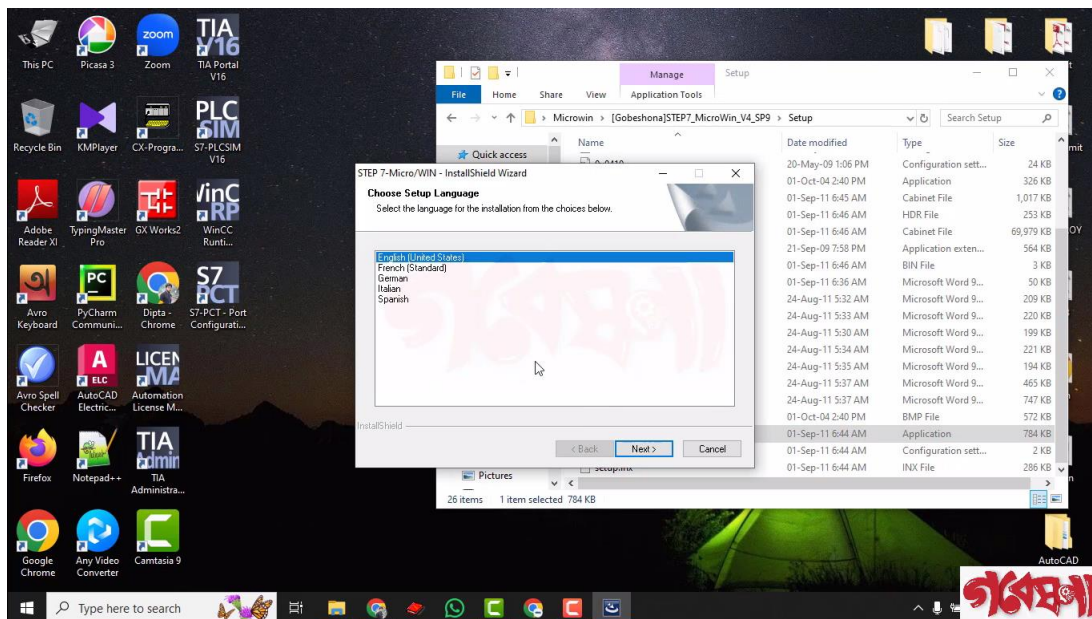

- [Gobeshona]STEP7_MicroWin_V4_SP9
- [Gobeshona]S7_200_Simulator 3.0

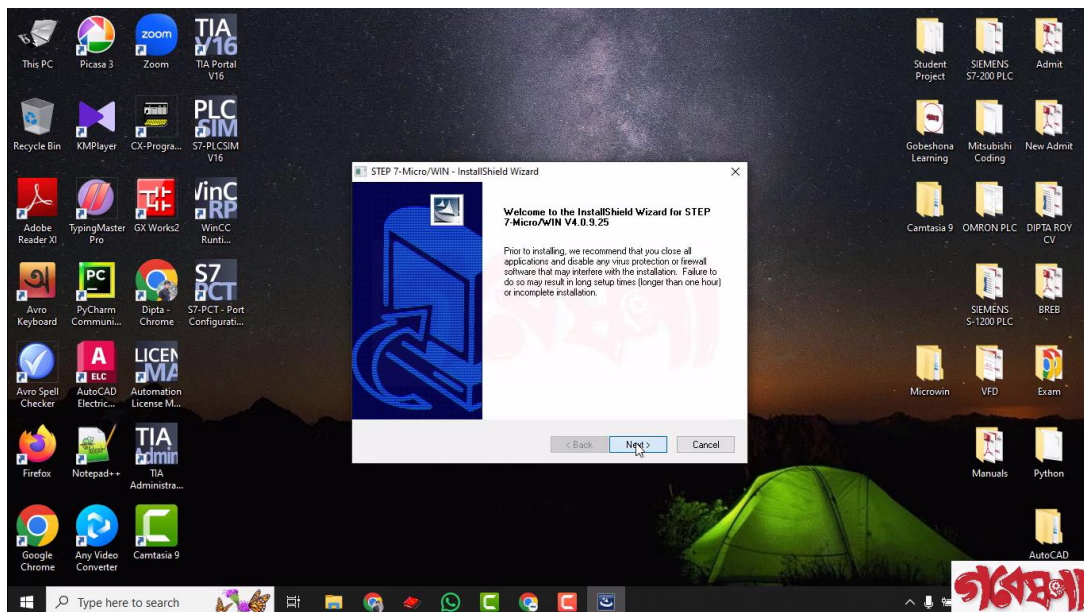

- Step-2: We have to open
“[Gobeshona]STEP7_MicroWin_V4_SP9” folder and Run the
“setup.exe” file.

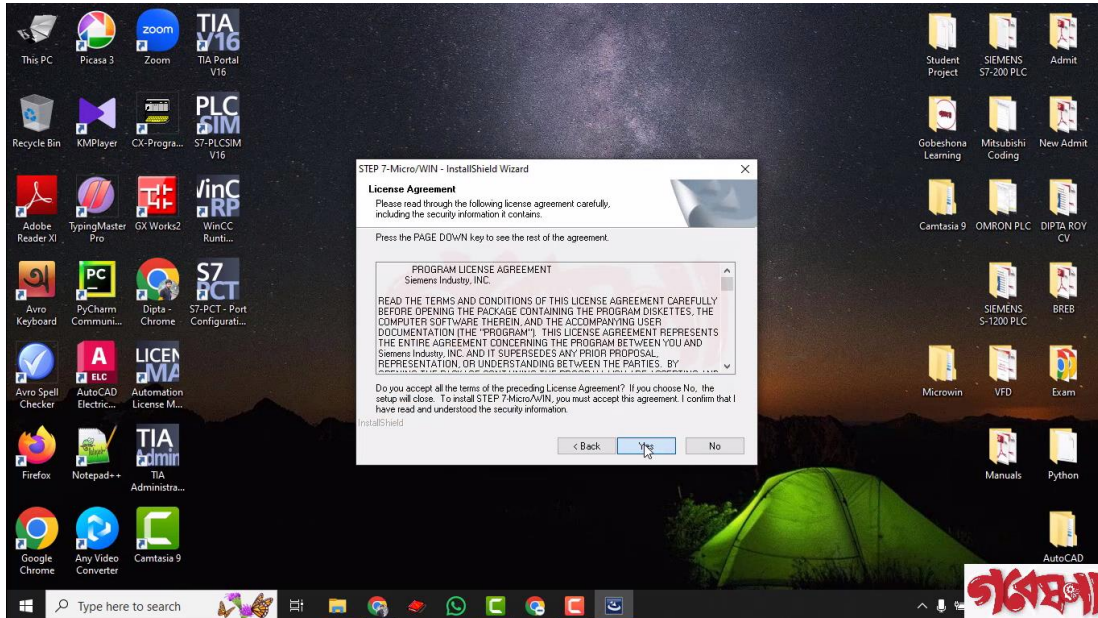

- Step-3: Then select “English” as “Choose Setup Language” and click “Next”.

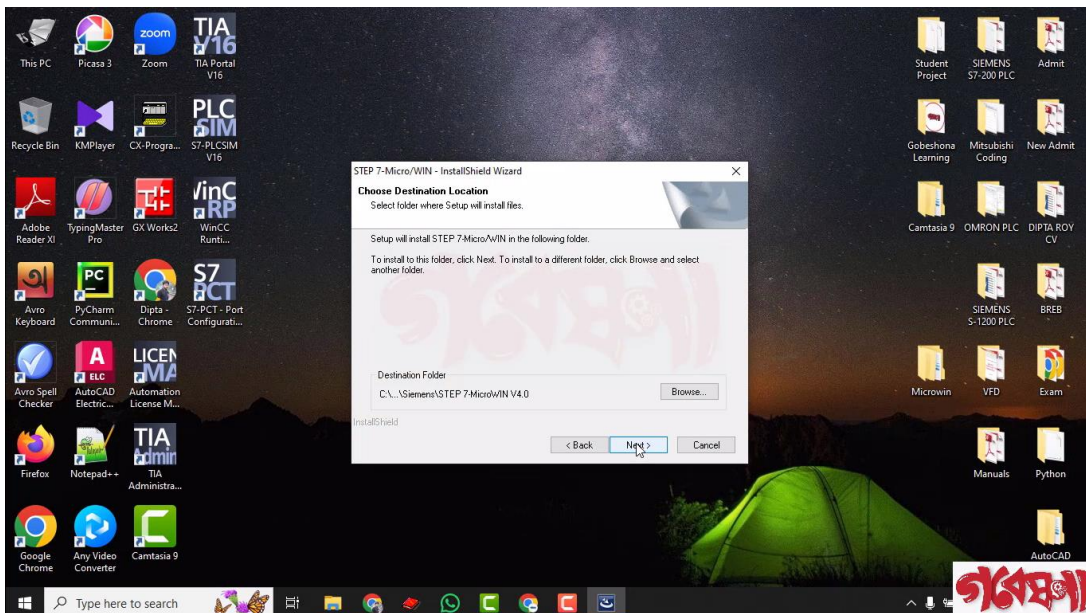

- Step-4: Again Click “Next”.

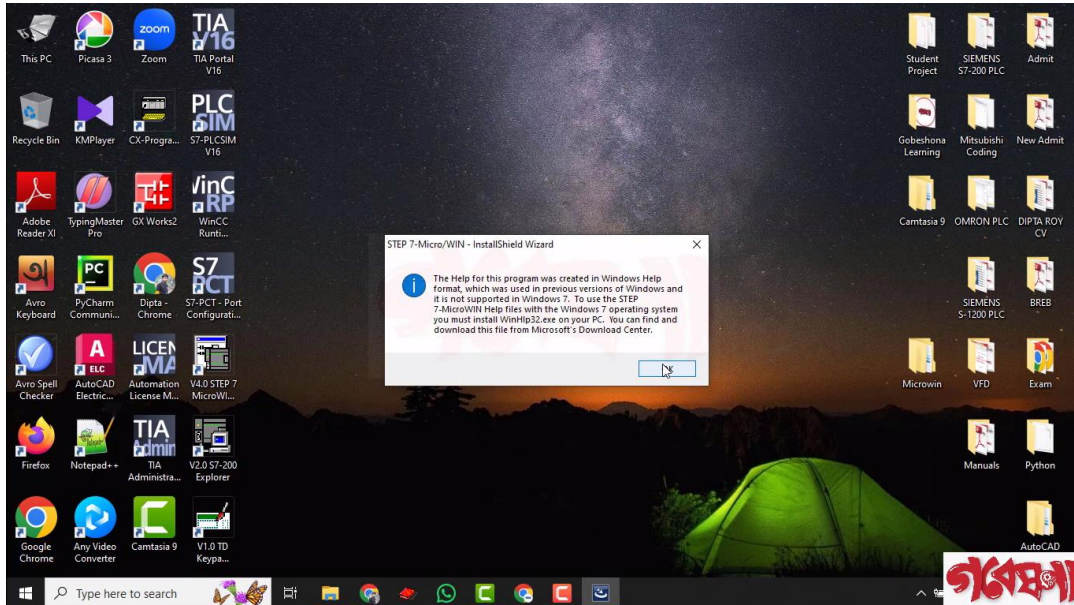

➤ Step-5: Click “Yes” and accept all the License Agreement.

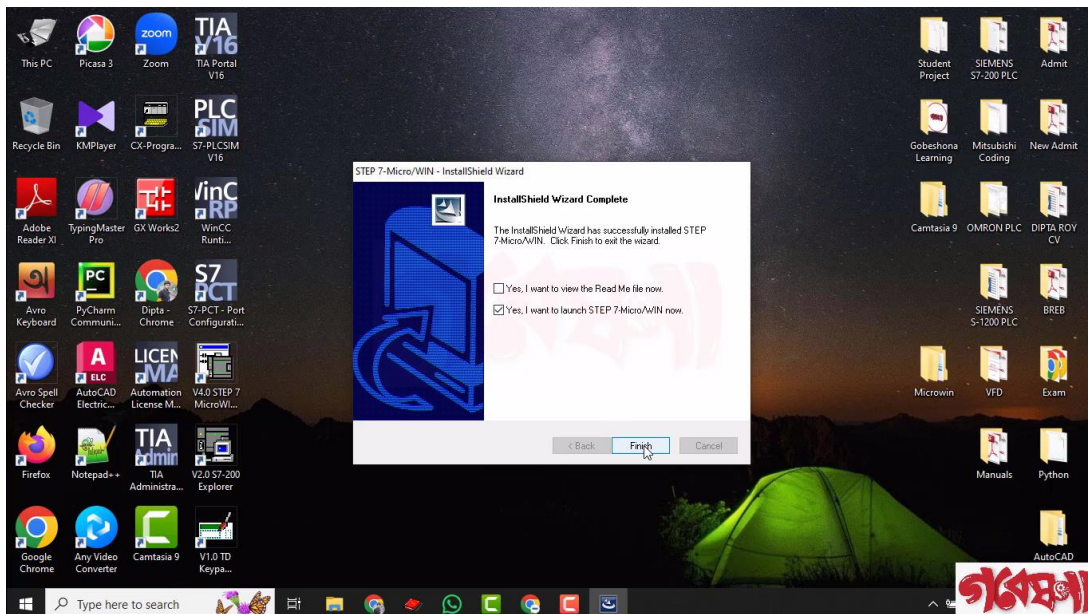

➤ Step-6: Then choose the destination location and click “Next”.

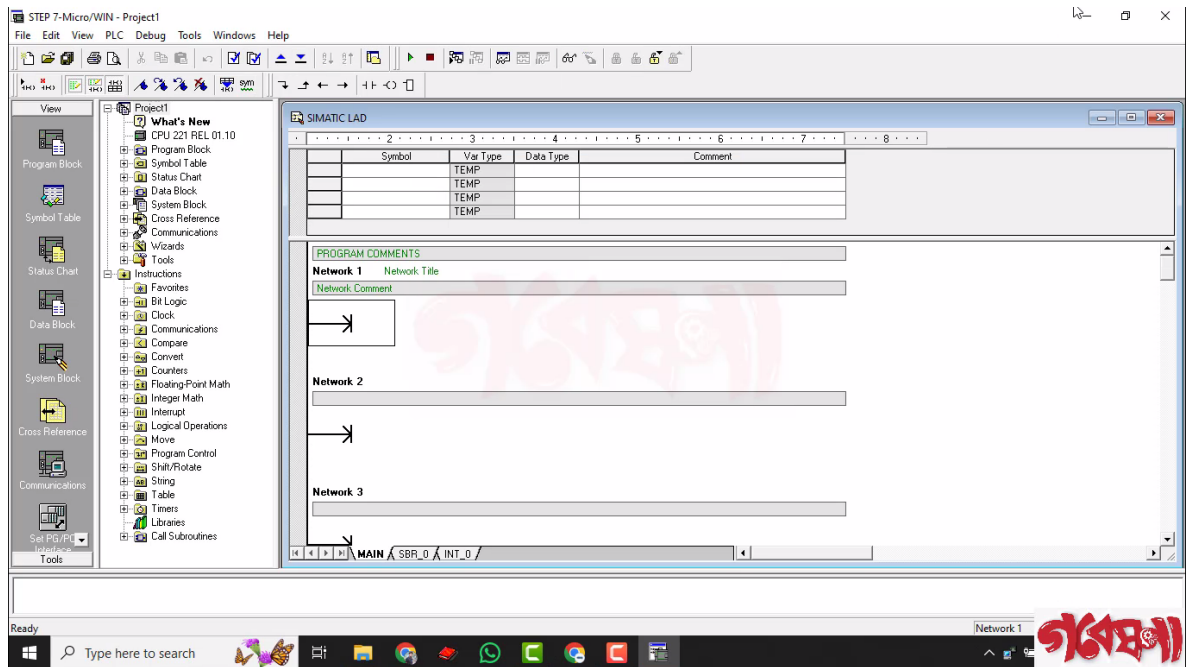

- Step-7: Then press “Ok”.

- Step-8: Finally by clicking “Finish” we will complete our installation process.

- Step-9: After installation we will get a shortcut icon named “V4.0 STEP 7 MicroWIN SP9”
Now “Open” it and write program to simulate.

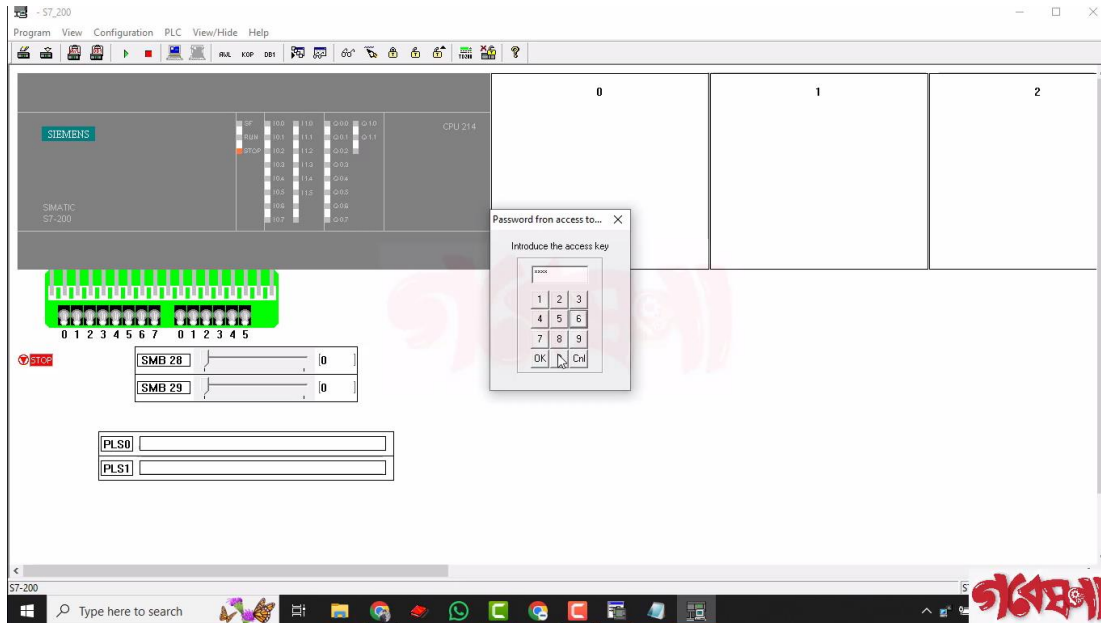

- Step-10: For Simulation we have to open
“[Gobeshona]S7_200_Simulator 3.0” folder.

After opening this folder we have to open the text document named “password for simulator” and remember the given password.

Password: 6596

➤ Step-11: Finally we have to open “S7_200.exe” file for simulation.

After opening this we can see small screen with password requirement. Now we have to set the desired password and press “ok”.

Our whole installation process is completed now.

Write your own program and Enjoy.
